SUMMARY

Developer with 1 years of experience in C#, Python, HTML5, and JavaScript. Proven ability to create reusable components for an enterprise-level application. Passionate about technology and building scalable web solutions.

EXPERIENCE

Developer

Freelancer

- I have experience as a freelance developer, offering tailored solutions to clients. Through my independent work, I've crafted diverse and personalized websites, meeting unique project requirements. My skills encompass web development, design, and implementation, ensuring a seamless user experience. I'm adept at translating client visions into functional and visually appealing websites. This freelance journey has honed my ability to adapt to various project scopes, deadlines, and client needs, fostering a dynamic and client-focused approach. With a keen eye for detail and a commitment to delivering high-quality results, I have successfully contributed to the online presence and success of numerous individuals and businesses.
-

PROJECTS

To Do List

September 2023

- I've developed a personalized to-do list application using C# that not only helps you organize tasks but also automatically generates a file on your device to store them securely.

Employee Management System

November 2023

- The Employee Management System is a powerful tool developed in C# for simplifying HR tasks. From onboarding to performance tracking, this system streamlines workforce management with efficiency and ease of use.
-
